Drum Magnetic Separator BSHM

Designed for extraction of magnetic admixtures from the products of bullet mills in the automatic mode.

Installed at discharge flange of bullet mill.

Capacity t/h	170
Diameter of mounting flange outer, mm	1040
Diameter of mounting flange internal, mm	750
Coverage of magnetic system, degrees	195
Operating temperature, not more, °C	60
Length of rotating drum, mm	550
Width of magnetic system, mm	320
Dimensions, mm	85 x 240...300
Magnet material	Nd-Fe-B

Designing and manufacturing of separators for other standard size of bullet mills that are used on specific industries according for customer's requirements is available.
