Tunnel Metal Detectors DMT2A

Designed for detecting metallic impurities (ferrous and non-ferrous metals) in the flows of nonmetallic products with the purpose to protect technological equipment from damage.

Installed at enterprises of woodworking industry on the lines of log, chips, veneer-sheets supply, chip plate polishing; also applied in mechanical rubber and other industries.

Name	Frame dimensions, mm			Overall dimensions, mm
	A	B	C	
DMT2A 25x10	250	100	450	670x440x300

1. Metal detectors' sensitivity is in accordance with technical specification.
2. Speed of product motion is 0.3 - 3 m/s.
3. Type of alarm - light, sound, conveyor intermittence.
4. Power consumption is up to 100 W.
5. Manufacturing of metal detectors accounting for customer's requirements is available.
